

Software Engineering

COMP 3500SEF
COMP 8500SEF

Teaching Team

□ Dr. Ndudi Ezeamuzie

□ Dr. Yishu Li

□ Dr. Patrick Chan

□ Mr. Ethan Lee

... members of the teaching team will introduce themselves at the tutorials

Course Coordinator

Dr. Ndudi Ezeamuzie

- ❑ Email: nezeamuz@hkmu.edu.hk
- ❑ Phone: +852 – 2768 5947
- ❑ Office: A0342
- ❑ Consultation hours: by appointment (e-mail)

About me

- ❑ **PhD** (STEM & Computer Science Education) - HKU
- ❑ **MSc** (Computer Science)- HKU
- ❑ **BSc** (Computer Science) - NAU

Teaching Experience

- Introduction to Internet Application Development
- Information System Administration
- Software Engineering & Software Project Management
- Teaching Professional: Education in a Globalized Society
- Making Sense of Science-Related Social Issues

Research Areas

Computer Science Education, Computational Thinking, STEM Education, Digital Literacy, Curriculum And Instruction, Learning Science, Educational Technology, Artificial Intelligence, Data Science

My lovely family 😊

My Teaching Philosophy

- ❑ Active Learning: Learn by Doing
- ❑ Participation: Engage actively in class activities
- ❑ Collaboration: Many tasks will require group work
- ❑ Problem-based learning
- ❑ Often, the process of solving problem is equally important
- ❑ Reward reasonable attempts.
- ❑ It is OK to learn from failure

Teaching Team

Dr. Yishu Li

Senior Lecturer

PhD CityUHK

Office: Room A0345, Block A, 3/F, MC

Email: sliy@hkmu.edu.hk

Office Phone: 2768 5971

COMP 3500SEF (L02/T02)

Teaching Team

Dr. Patrick Chan

Lecturer

BCom Cantuar, MCom Cantuar, PhD CityUHK

Office: Room A0344, Block A, 3/F, MC

Email: ppychan@hkmu.edu.hk

Office Phone: 2768 5952

COMP 3500SEF (L03/T03)

COMP 8500SEF (L01; Lecture Only)

Teaching Team

Mr. LEE Yeu Kar Ethan

Tutor – COMP 8500SEF (T02)

eyklee@hkmu.edu.hk

Lecture and Tutorial Schedule

□ Mode of Delivery: Face-to-Face

- | | | |
|---|----------|---------------|
| ○ COMP 3500SEF (L01/T01) | Tuesday | 09:00 – 11:50 |
| ○ COMP 3500SEF (L02/T02) | Tuesday | 15:00 – 17:50 |
| ○ COMP 3500SEF (L03/T03) | Monday | 12:00 – 14:50 |
| | | |
| ○ COMP 8500SEF (L01; <i>Lecture Only</i>) | Monday | 12:00 – 13:50 |
| ○ COMP 8500SEF (T01; <i>Tutorial Only</i>) | Tuesday | 12:00 – 12:50 |
| ○ COMP 8500SEF (T02; <i>Tutorial Only</i>) | Saturday | 12:00 – 12:50 |

Please always check the OLE for most updated information

Course Communication

When you have question, don't hesitate to ask 😊

❑ WhatsApp Group

- See OLE for details (Week 1, *Join Course WhatsApp Group*)
- Our preferred channel → For quick response; someone may reply you immediately 😊
- **Please use Group chat! Direct messages (DM) are not monitored**

❑ Email

- For personal matters, you are welcome to send an email
- Add **Course Code** and the **Student's Name** as part of the email subject.

Course Aims

This course aims to introduce the concepts and applications of software engineering, explain their potential impacts on software productivity, quality assurance, cost and time to market during different software life cycles.

Students will learn practical development skills in software design, implementation, testing and maintenance.

Details: See course document in OLE

Course Intended Learning Outcomes

Upon completion of this course, students should be able to:

1. **Explain** software engineering concepts and activities.
2. **Create** software development project artifacts (e.g. software requirements specification).
3. **Design** software systems to meet user requirements.
4. **Select** a suitable software development process based on requirements and resources.
5. **Apply** quality assurance methods (e.g. testing and inspection).
6. **Make** ethical decisions playing the role of a software engineer.

Reference Textbook

Course Assessment

	<i>Assessment</i>	<i>Weighting</i>
OCAS	a. Assignments (individual score)	30%
	b. Test (individual score)	20%
OES	c. Group Project	50%
	Total	100%

❑ **No Final Examination**

❑ **Very Important:** Student require minimum of **50%** in OCAS and **50%** in OES

My Recommendation

Active Participation

- Students may be required to answer questions.
- Bring your laptops/tablets for submitting your answers (no paper submission)
- Format of activities will vary, including multiple-choice and essay-type questions

Attendance in Lectures and Tutorials is important

- We will use the [iAttend App](#) or [QR Code](#) to record attendance
- If you encounter any problem with the iAttend App, please contact ITO for support.

Assignments (individual score) – 30%

Two Assignments

- Week 4 - 5
- Week 6 – 7

Marking Guide

All assignments will be graded on the following basis

- **Participation:** Points will be awarded for active participation
- **Attempt:** Points will be awarded for reasonable attempts
- **Correctness:** Points will be awarded for correct solutions.

Test (individual score) – 20%

- ❑ COMP 3500SEF (L01): Nov 24, 2026 [Tuesday] - Week 13
- ❑ COMP 3500SEF (L02): Nov 24, 2026 [Tuesday] - Week 13
- ❑ COMP 3500SEF (L03): Nov 30, 2026 [Monday] - Week 13
- ❑ COMP 8500SEF (L01): Nov 30, 2026 [Monday] - Week 13
 - Time/Venue: *Same as the Lecture schedule*
 - Students will be required to bring their laptops for the test.

Project – 50%

The Project (OES component) will be graded as follows

- ❑ Project **Progress Review** (In-class; Wk 10 – 12) – 10%
- ❑ Project **Presentation** (Video Recorded) – 10%
- ❑ Project **Report** – 15%
- ❑ Project **Logbook** (Individual Component) – 15%

Project Group Composition

- ❑ 7 - 10 persons per group (Min = 7 and Max =10)
- ❑ Each group will select a leader.
- ❑ Members of a project group **must** be from the same lecture group
 - COMP 3500SEF (L01), COMP 3500SEF (L02), COMP 3500SEF (L03), COMP 8500SEF (L01):
- ❑ **Only** the group leader (or representative) is required to submit the list of members.
 - Please complete the form (See OLE -Week 1, *Project Group*)
- ❑ Students who **cannot** find or form a group,
 - Please complete the form (See OLE -Week 1, *Project Group*)
 - Students will be assigned to a random group
- ❑ No change in the grouping will be allowed after the deadline
- ❑ Deadline: **September 15, 2026**

Project Topic

- ❑ Groups will choose from a pool of project topics
- ❑ Groups will apply the theories and principles in software engineering in the project.
- ❑ The project topics will be released after group formation (**Sep 16, 2026**).

Project Progress Review (1/2)

❑ Aims / Objectives

- An opportunity for students to learn from peers.
- Get feedback from the lecturers and peer
- Clarify misunderstandings in Concepts
- Brainstorm and correct mistakes
- Learn from multiple case studies
- Facilitate collaboration and cooperative skills.
- Build confidence in English and public speaking

❑ Recommendations

- Communicate with your team members to organize and practice your progress review.
- Don't be late
- Time management is important.
- Don't read your slides. Don't read from a mobile phone. Explain your project.

Project Progress Review (2/2)

- ❑ Presentation Arrangement – (In-class presentation)
 - Each group will have **10** minutes to summarize their project
 - The presentation will take place in the lecture & tutorial on
 - Week 10 – **Nov 3 and 9**
 - Week 11 – **Nov 10 and 16**
 - Week 12 – **Nov 17 and 23**
- ❑ The slot and order of presentation will be announced on **Oct 27, 2026**

Project Presentation (1/2)

□ Aims / Objective

- Develop solid experience in computing project presentation
- Facilitate collaboration and cooperative skills.
- Build confidence in English and public speaking

□ Recommendations

- Communicate with your team members to organize and practice your presentation.
- Time management is important.
- Don't read your slides. Don't read from a mobile phone. Explain your project.

Project Presentation (2/2)

- Presentation Arrangement – (Recorded video)
 - Each group will record a 15 – 25 minutes video that describes the software engineering project and process in detail

Project Report

- ❑ Submit a project report
 - Not more than 1000 words
 - Note: Source Codes is not included in the word count.
 - Source Codes must be submitted as an **accessible GitHub** with a guide on how to install/run it (*put the GitHub link as the first line of your report*).
 - **Free Format** – Groups can choose any reporting format/template.
- ❑ The leader (only) or representative will submit the group's **project report** in a PDF through the assignment submission link in OLE.
- ❑ Deadline: **Dec 8, 2026** (**Early submission is encouraged. Late Submission will not be accepted**)

Project Logbook

- ❑ Note: This is an Individual Component
 - ❑ Don't copy from your group members! Otherwise, it will be considered plagiarism.
- ❑ Students should keep a **personal** logbook of the software engineering experience
 - Students will submit **interim** progress on the following dates: **Sep 30, Oct 15, Oct 30, Nov 15**
- ❑ The content of the logbook should include
 - a. The agenda, plans, members' participation, and summary of activities in every group meeting (not more than 200 words for each meeting)
 - b. Personal contribution in every group meeting (not more than 100 words).
 - c. Personal contribution to the project, project report and project presentation
- ❑ **All students** will submit their **final** project logbook and will answer questions about their participation in the project.
- ❑ Deadline: **Dec 8, 2026** (Early submission is encouraged. Late Submission will not be accepted)

Project Assessment Rubric (1/4)

Project Progress Review (10%)

- ❑ **Structure:** Introduction, Sequence and Summary (5 %)
- ❑ **Presentation:** Simple and Clear (5 %)
 - Please avoid reading slides.

Project Assessment Rubric (2/4)

Project Presentation (10%)

- ❑ **Structure:** Introduction, Sequence and Summary (5 %)
- ❑ **Presentation:** Simple and Clear (5 %)
 - Please avoid reading slides.

Project Assessment Rubric (3/4)

Project Report (15 %)

❑ Quality of Project Management (12%)

Correct use of software engineering **concepts** such as software processes, requirement engineering, system modeling, architectural design, design and implementation, software testing, and software evolution **etc**. Note that the list of concepts is not exhaustive. As software projects are unique, show your understanding of software engineering

❑ Quality of Report (3%)

Organization, Design & Analysis, Writing

Project Assessment Rubric (4/4)

Project Logbook (15%)

- ❑ **Level of participation in the group project (10%)**

- This includes all activities such as group meetings, reports and presentations.

- ❑ **Quality of Logbook (5%)**

Organization, Design & Analysis, Writing

Thank you
